MEMORANDUM FOR: Director of Central Intelligence

VIA: Deputy Director of Central Intelligence ✓
Special Assistant to the DCI for Compartmentation
Deputy Director for Administration

STAT FROM:
Chairman

SUBJECT: Physical Security Standards for SCI Facilities

1. Action Requested: Concurrence to circulate for NFIB approval proposed Intelligence Community physical security standards for facilities handling or storing Sensitive Compartmented Information (SCI).

2. Discussion: Community physical security standards for SCI facilities are now stated in a 1973 USIB approved document. The DCI Security Committee reviewed that and unanimously approved an updated version for use with the then pending APEX System. NFIB members concurred in the update in November 1980. A summary of the changes is attached.

After the 12 January 1981 NFIB meeting, which resulted in a consensus not to proceed with APEX, the DCI directed the Security Committee to review the draft update, remove references to APEX, and proceed through established channels to obtain NFIB concurrence and DCI publication. The Security Committee has accomplished the review and editing tasks. A copy of the galley proof of the new standards is attached. It is substantively identical to the November 1980 version approved by NFIB, edited to make the standards applicable to SCI instead of APEX. Committee members believe the new standards are a desirable updating of Community security procedures.

3. Recommendation: That you approve circulation of these proposed standards to the NFIB for their concurrence and subsequent issuance by you as a binding policy guide.
